INDEX TO VOLUME XI.*

A

Academy of Sciences, National, meeting at Washington, 400.
Acadia, Physiography of, Daly, 470.
Adams, E. P., circular magnetization and magnetic permeability, 175.
Air, spectrum of volatile gases in, Liveing and Dewar, 154; presence of hydrogen in, Rayleigh, 165.
Albuquerque Sheet, geology, Herrick and Johnson, 171.
American Museum of Natural History, gift to, 174.
Astronomical Observatory, Harvard University, annals 173, 474.
Astrophysical Observatory at Washington, work of, Abbot, 401; Langley, 403, 473.
Atmospheric air, see **Air.**
— radiation, Very on, Hallock, 230.
Australia, Western, Geol. Survey, 396.

B

Bailey, L. H., Elementary Botany, 250.
Barus, C., apparent hysteresis in torsional magnetostriction, 97; velocity of the ionized phosphorus emanation, 237; phosphorus emanation in spherical condensers, 310.
Becquerel rays, 395.
— See **radio-active.**
Bell, W. T., concretions of Ottawa Co., Kansas, 315.
Bergen, J. Y., Foundations of Botany, 248.
Bermudas, fauna of, papers on, 326, 330.
Bigelow, F. H., magnetic theory of the Solar Corona, 253.
Birds, anatomy of, Häcker, 251.
Boston Basin, geology of, Crosby, 324.
Botany, elementary, Bailey, 250.
— Foundations of, Bergen, 248.
— Studies in Fossil, Scott, 471.

BOTANY.

African plants collected by Dr. Welwitsch, Hiern, 249.
Coffee plant, diseases and enemies, Delacroix, 92.
Cyperaceæ, studies in, xv, Holm, 205.
Erigenia bulbosa, Holm, 63.
Flora of California, Jepson, 471.
— of Cheshire, Moore, 398.
— of Grand Rapids, Mich., Cole, 472.
— of Vermont, Brainerd, Jones and Eggleston, 249.
Oedogoniaceæ, Hirn, 93.
Plant Life and Structure, Dennert, 250.
Platydorina, Kofoid, 94.
Sclerotiniae, Woronin, 94.
Spermatophyta of North Dakota, Bolley and Waldron, 398.
Umbelliferæ, No. American, Coulter and Rose, 247.

C

Canada, Geological Survey, 402; general index, 170.
— minerals of, Hoffmann, 149.
Carbon compounds, spectrum, Smithells, 466.
Chemical Analysis, Qualitative, Sellers, 164.
Chemistry, Analytical, Classen, 319; Ostwald, 466.
— Introduction to Modern Scientific, Lassar-Cohn, 319.

CHEMISTRY.

Acetylene, combustion in air with oxygen, Bourgerel, 87.
Alcohol, action on metals, Malmé-jac, 394.
Aluminum oxides, spectrum, 467.
Ammonium amalgam, Coehn, 163.
— bromide, Scott, 317.

* This Index contains the general heads, BOTANY, CHEMISTRY (incl. chem. physics), GEOLOGY, MINERALS, OBITUARY, ROCKS, and under each the titles of Articles referring thereto are mentioned.

CHEMISTRY.

Argon and its companions, Ramsay and Travers, 166.
Atomic weights, method of determining, Benoist, 464.
Cæsium-antimonious fluorides, Wells and Metzger, 451.
Carbon compounds, spectrum, 466.
— non-existence of trivalent, Norris, 236.
Cerium, Drossbach, 236.
Chemical reactions, velocity of, Duane, 349.
Chlorine, preparation from sodium chlorate, Graebe, 392.
— heptoxide, Michael and Conn, 235.
Chromium in acids, phenomena connected with solution of, Ostwald, 84.
Crystals, method for obtaining, Wróblewski, 236; Rümpler, 318.
Diethyl peroxide, Baeyer and Villiger, 162.
Gallium in the sun, Hartley and Ramage, 323.
Gases in air, Liveing and Dewar, 154.
— combustion of, Tantar, 86, 317.
Gold, diffusion in solid lead, Roberts-Austin, 236.
Helium, 166, 154.
Hydrate of sulphuryl chloride, Baeyer and Villiger, 393.
Hydrogen, boiling point of, Dewar, 291; in air, Rayleigh, 165.
— peroxide, action upon silver oxide, Baeyer and Villiger, 393.
— telluride, Ernyei, 163.
Krypton, Ladenburg and Kruegel, 85, 166.
Lead, radio-active, Hofmann and Strauss, 235, 463.
Magnesium and aluminum, Duboin, 464.
Methane elimination in the atmosphere, Urbain, 318.
Neon, properties, 154, 166.
Ozone, molecular weight, Ladenburg, 391.
Phosphorus, emanation from, Barus, 237; in spherical condensers, 310.
Platinum, loss of weight when heated, 164.
— presence upon an Egyptian inscription, 465.
Potassium and sodium sulphocyanides, color when heated, Giles, 318.
Radium rays, action upon selenium, Bloch, 464.
Radium rays, physiological action, Walkhoff, 235.
Sulphur hexafluoride, etc., Moissan and Lebeau, 391.
Tobacco, new alkaloids in, Pictet and Rotschy, 392.
Trouton's law, generalization from, 465.
Xenon, properties, 166.
Zirconia of euxenite, Hofmann and Prandtl, 463.

Cilley, F. H., theory of elasticity, 269.
Classen, A., Analytical Chemistry, 319.
Clayton, H. H., eclipse cyclone, 321.
Conductivities of double salts, Lindsay, 164.
Connecticut Academy of Sciences, 330.
Copper and Zinc, thermo-chemistry of alloys of, Baker, 237.
Corona, Solar, theory, Bigelow, 253.
Cosmogony, theories of, O. Fisher, 414.
Crook, Z., yoke with intercepted magnetic circuit, for measuring hysteresis, 365.
Crystals, method of obtaining, Rümpler, 318; Wroblewski, 236.
Cycads, American fossil, Wieland, 423.

D

Davison, C., velocity of seismic waves, 95.
Day, A. L., melting point of gold, 145; expansion of metals at high temperatures, 374.
Derby, O. A., occurrence of topaz, Ouro Preto, Brazil, 25.
Deserts, formation of, Walther, 326.
Dewar, J., spectrum of the volatile gases of atmospheric air, 154; boiling point of hydrogen, 291.
Douglass, E., new species of Merycochœrus in Montana, 73.
Duane, W., velocity of chemical reactions, 349.

E

Earth, theories of origin, Fisher, 414.
Earthquake waves in the ocean, 95.
Eclipse cyclone, Clayton, 321.
Elasticity, theory of, Cilley, 269.
Electric charge, effect of magnetic field upon, Cremieu, 87.
— conductivity produced in gases, Townsend, 238; of double salts, Lindsay, 164.
— convection, Cremieu, 87, 321.

Electric discharge, mechanical movements of wires, produced by, Viol, 467.
— oscillations in charging condensers, Sundell and Tallquist, 238.
— waves, metallic reflection, Lindman, 394.
Electricity effect on bacteria, Macfadyen, 320.
Electricity and Optics, Poincaré, 467.
Electron theory of metals, Drude, 88.
Ether, possible magnetic effect of earth on, Rollins, 322.

F

Farrington, O. C., metallic veins of the Farmington meteorite, 60.
Fauna of the Bermudas, papers relating to, 326.
Fisher, O., theories of cosmogony, 414.
Flora of West Middle California, Jepson, 471.
Florida, Tertiary fauna of, Dall, 170.
Fossil, see **GEOLOGY.**

G

Gas in a Crookes tube, absorption, Willow, 467.
Gases, present in air, 154, 165, 166.
Geikie, A., Founders of Geology, 326.
GEOLOGICAL REPORTS.
Canada, 402; general index, Dowling, 170.
Great Britain, 252, 402.
Kansas. University Survey, 324.
Maryland, 240.
Michigan, vol. vii, pt. III., 241.
Minnesota, vol. v, 88; 24th Annual Report, 242.
United States, 240, 395; 21st Annual report, Walcott, 468.
Western Australia, Maitland, 396.
Geologisches Centralblatt, Keilhack, 243.
GEOLOGY.
Albuquerque Sheet, Herrick and Johnson, 171.
Amphicyon, new species, Wortman, 200.
Boston Basin, geology, Crosby, 324.
Cambrian fossils, new from Cape Breton, Matthew, 396.
Concretions from clays of Connecticut Valley, Sheldon, 397.
— of Ottawa County, Kansas, 315.
Cosmogony, rival theories, Fisher, 414.
Creosaurus, Williston, 111.
Cycads, American fossil, Wieland, 423.
Deserts, law of the formation of, Walther, 326.
Eocene and lower Oligocene coral faunas of U. S., Vaughan, 395.
— Mammalia in the Marsh collection, Wortmann, 333, 437.
Fossil Botany, Studies in, Scott, 471.
Gabbroid rocks of Minnesota, Winchell, 89, 397.
Glaciers, periodic variations, Forel, 168.
Ground-Moraine, Orange River, So. Africa, Rogers and Schwarz, 325.
Indian Territory, geology, etc., Gould, 185.
Limestone conglomerate in the lead region of Missouri, Nason, 396,
Marble, flow of under pressure, Adams and Nicolson, 397.
Merycochœrus in Montana, Douglass, 73.
Mesozoic Fossils, vol. i, pt. IV., Whiteaves, 171.
Metasomatic processes in fissure veins, Lindgren, 243.
Ohio Coal-measures, Prosser, 191.
Pleistocene geology of the Sierra Nevada, Turner, 242.
Tertiary fauna of Florida, Dall, 170.
— springs of West. Kansas and Oklahoma, Gould, 263.
Texas, geolog. papers from 1886–1896, Simonds, 170.
— region, physical geography, Hill, 90.
Geology, Founders of, Geikie, 326.
Glaciers, see **GEOLOGY.**
Gold, melting point of. Holborn and Day, 145.
Goode, George Brown, Memorial, 401.
Gould, C. N., geology of Indian Territory, etc., 185; Tertiary Springs of West. Kansas and Oklahoma, 263.

H

Hageman, S. A., a just intonation piano, 224.
Hallock, W., Very on atmospheric radiation, 230.
Harvard Astronomical Observatory, publications, 173, 474.
Hill, R. T., physical geography of the Texas region, 90.
Hoffman, G. C., new minerals in Canada, 149.

Holborn, L., melting point of gold, 145; expansion of metals at high temperatures, 374.
Holm, T., Erigenia bulbosa, 63; studies in the Cyperaceæ, xv, 205.
Hydrogen, boiling point, Dewar, 291; light transparency of, Schumann, 394; present in air, Rayleigh, 165.
Hygiene, Journal of, English, 474.
Hysteresis, apparent, in torsional magnetostriction, Barus, 97.
— measurement of, Crook, 365.

I

Indian Territory, etc,, geology, Gould, 185.
Indian village, old, Udden, 95.
Induction, unipolar, Lecher, 87; Hagenbach, 320.
Ions, producing conductivity, 238.
Italy, volcanoes of central, Sabatini, 171.

J

Jepson, W. L., Flora of West Middle California, 471.

K

Kansas, University geological survey, 324.
Knight, N., Iowa dolomites, 244.

L

Langley, S. P., the new spectrum, 403; annals of Astrophysical Observatory, 473.
Lassar-Cohn, Introduction to Modern Scientific Chemistry, 319.
Liveing, S. D., spectrum of the more volatile gases of atmospheric air, 154.

M

Magnetic effect of the earth on the ether, attempt to show, Rollins, 322.
— field, effect on discharges through a gas, Willow, 238.
Magnetization, circular, and magnetic permeability, Trowbridge and Adams, 175.
Magnetostriction. Barus, 97.
Maryland Geological Survey, Clark, 240.
Matthew, G. F., new Cambrian fossils from Cape Breton, 396.
Mechanics, Slate, 174.
Metals, electron theory of, Drude, 88.
— expansion at high temperatures, Holborn and Day, 374.
Meteorite, Farmington, Kansas, metallic veins, Farrington, 60.
Methane, elimination in the atmosphere, Urbain, 318.
Metzger, F. J., caesium-antimonius fluorides, 451.
Michigan Geol. Survey, vol. vii, pt. III, Lane, 241.
Microbes et Distillerie, Lévy, 251.
Mineral constituents of dust and soot, Hartley and Ramage, 470.
Mineralogy, Rutley, 92.

MINERALS.

Anorthite crystals, New Jersey, 369.
Badenite, Roumania, 91. Brostenite, Roumania, 92.
Corundum, N. Carolina, Lewis, 92.
Danalite, Canada, 151.
Feldspar crystals, Colorado, 371.
Iron wolframite, South Dakota, 372.
Lepidolite, Quebec, 149. Ledouxite, 457.
Mohawkite, 457.
Newberyite, Yukon district, 149.
Scheelite pseudomorphs, Connecticut, 373. Schorlomite, British Columbia, 150. Spodumene, Canada, 152. Struvite, Yukon district, 149.
Thulite, Maryland, 171. Topaz, Brazil, 25.
Uranophane, Quebec, 152.
Wolframite, iron, So. Dakota, 372.
Zoisite, Maryland, 171.

Minerals of the Argentine Republic, Bodenbender, 246.
— and Rocks, Textbook of, Tillman, 246.
Minnesota, Geol. Survey, 88: 242.
— study of gabbroid rocks, Winchell, 89, 397.

N

Nason, F. L., limestone conglomerate in the lead region of Missouri, 396.
Navigation, Sub-Marine, Gaget, 402.
Norway, Official Publication of the Paris Exhibition, 174.

O

OBITUARY—
Agardh, J. C., 332.
Chatin, A., 332.
Dawson, G. M., 332.
Fitzgerald, George F,, 402.
Hermite, C., 332.
Lütken, C. F., 402.
Rowland, Henry A., 402.

Ohio State University Naturalist, 252.
Ontario, minerals of, Miller, 246.
Ores, deposition of, Van Hise, 90; Lindgren, 243.
Ostwald, W., Analytical Chemistry, 466.
Ostwald's Klassiker der exakten Wissenschaften, 252.

P

Penfield, S. L., stereographic projection, and its possibilities, 1, 115.
Perseus, new star in, Anderson, 399.
Piano, a just intonation, Hagemann, 224.
Phasenlehre, Roozeboom, 165.
Phosphorus emanation, velocity of the ionized, Barus, 237; action in spherical condensers, 310.
Photographic records, preservation of, Lockyer, 321.
Physical data, compilation of, 239,
Physics, Problems in, Snyder and Palmer, 239.
Physiology of the Brain, Loeb, 251.
— Experimental, Dubois and Couvreur, 330.
Poincaré, H., Électricité et Optique, 467.
Projection, stereographic, Penfield, 1, 115.
Prosser, C. S., names of formations of Ohio Coal-measures, 191.

R

Radiation law of dark bodies, Paschen, 320.
Radio-active lead, 235, 463; barium carbonate, 464.
Reid, H. F., obituary notice of H. A. Rowland, 459.
Richards, J. W., "Mohawkite" and Ledouxite, 457.
Rollins, W., attempt to show the magnetic effect of the earth on the ether, 322.

ROCKS.

Charnockite series in Peninsular India, Holland, 89.
Corundum-bearing, N. Carolina, Lewis, 92.
Dolomites, Iowa, Knight, 244.
Eruptive, about Ménerville, Algiers, Duparc, Pearce and Ritter, 89.
Gabbroid, of Minnesota, Winchell, 89, 397.
Glaucophane schists, chemical study, Washington, 35.
Marble, flow under pressure, Adams and Nicolson, 397.
Röntgen rays, measured by means of selenium, Himstedt, 395.
— and Becquerel rays, effect on the eye, Himstedt and Nagel, 395.
Roumania, minerals, Poni, 91.
Rowland, H. A., obituary notice, Reid, 459.
Rutley, F., mineralogy, 92.

S

Schimper, microscopic investigation of foods, 96.
Scott, D. H., Studies in Fossil Botany, 471.
Scripture, E. W., Yale Psychological laboratory, 168; nature of vowels, 302.
Seismic waves in the ocean, velocity, Davison, 95.
Sellers, Chemical Analysis, 164.
Sine currents, excitation and measure of, Wien, 394.
Slate, F., Mechanics, 174.
Smithsonian Institution, report, 400, 473, 474.
Soils, field operations of the division of, Whitney, 91.
Solar Corona, magnetic theory, Bigelow, 253.
Sound, transmission through porous material, Tufts, 357.
Spectrum, the new, Langley, 403.
— of aluminum and nitrogen oxides, 467; of carbon compounds, 466.
Standardizing Bureau, national, 332.
Star, Nova Persei, Anderson, 399.
Stereographic projection, Penfield, 1, 115.
Sun, see **Solar.**

T

Telegraphone, Poulsen, 166.
Telegraphy, wireless, Slaby and Arco, 165.
Texas, geology of, from 1886–1896, Simonds, 170.
Tillman, S. E., Textbook of Minerals and Rocks, 246.
Trancontinental triangulation, Schott, 172.
Trowbridge, J., circular magnetization and magnetic permeability, 175.
Tufts, F. L., transmission of sound through porous material, 357.

U

Udden, old Indian village, 95.
Unipolar induction, Lecker, 87; Hagenback, 320.
United States Coast Survey, 401.
— Geological Survey, Walcott, 240, 395, 468.
— National Museum Report, 474.

V

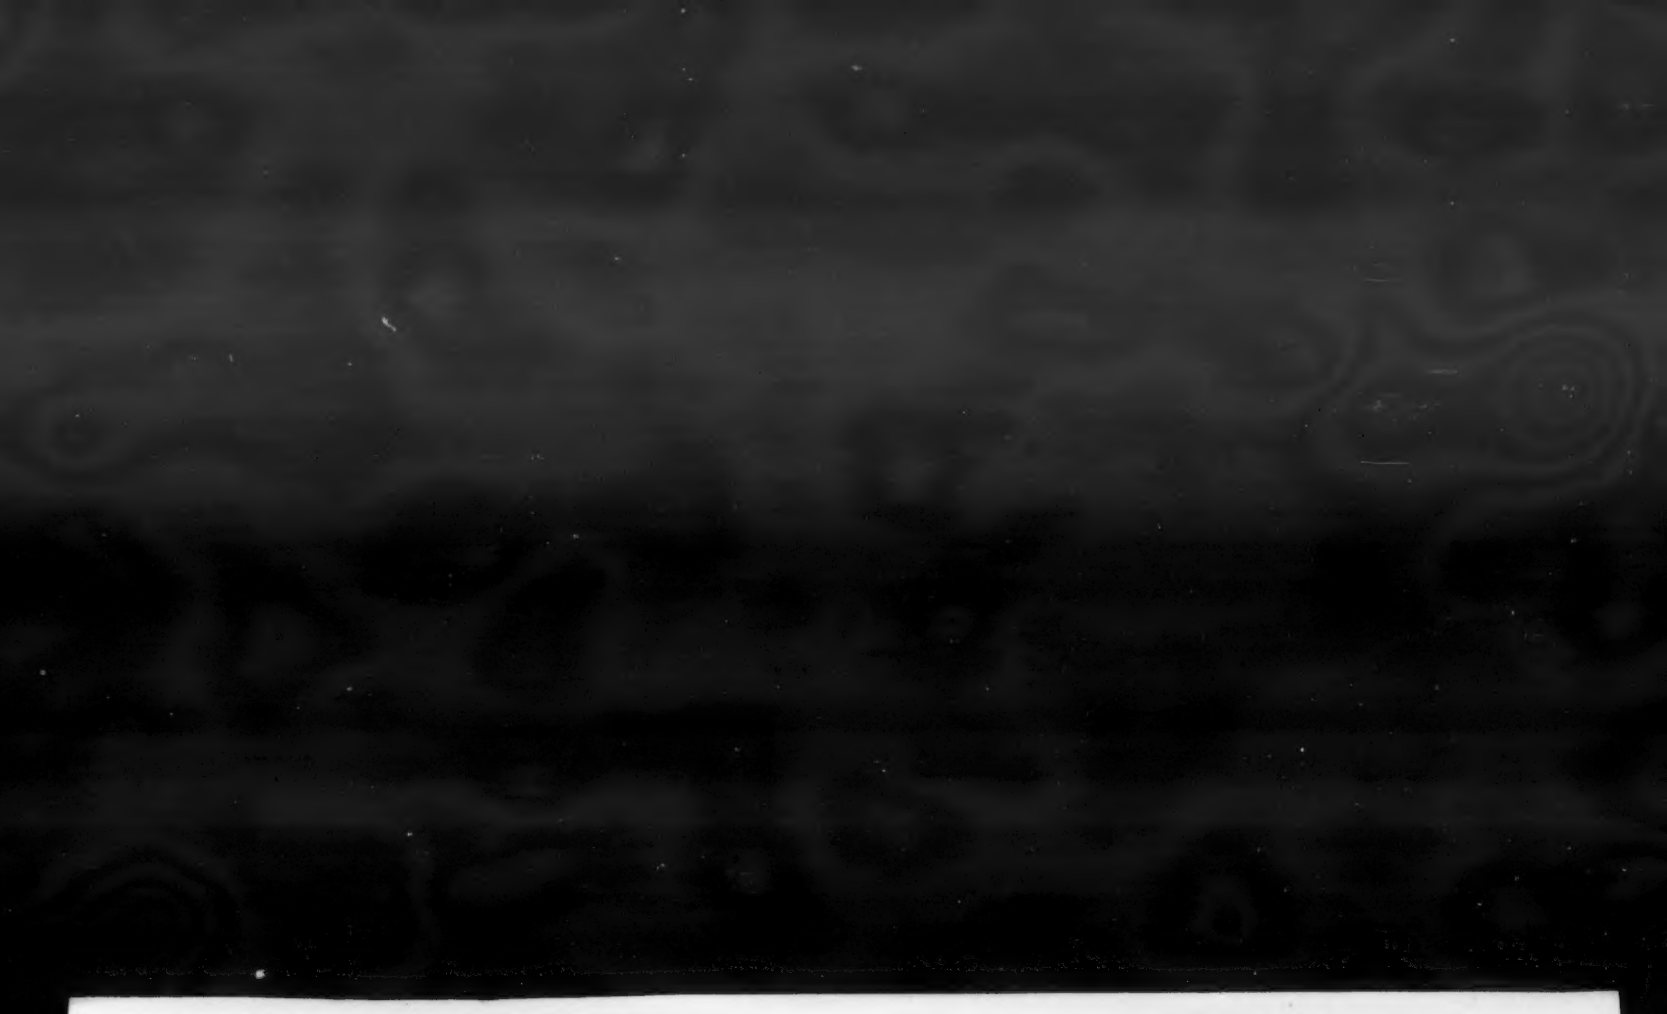
Van Hise, C. R., deposition of ores, 90.
Veins, formation of fissure, Lindgren, 243.
Velocity of seismic waves, Davison, 95.
Very, atmospheric radiation, 230.
Volcanoes of central Italy, Sabatini, 171.
Vowels, nature of, Scripture, 302.

W

Walther, J., das Gesetz der Wüstenbildung, 326.
Warren, C. H., mineralogical notes, 369.
Washington, H. S., chemical study of glaucophane schists, 35.
Webster's International Dictionary, 331.
Wehnelt interrupter, 88.
Wells, H. L., cæsium-antimonious fluorides, 451.
Wieland, G. R., American fossil cycads, 423.
Williston, S. W., Dinosaurian genus Creosaurus, 111.
Wortman, J. L., new American species of Amphicyon, 200; Eocene Mammalia in the Marsh collection, 333, 437.

Y

Yale Psychological Laboratory, vol. vii, 168.

Z


Zoological results on material from Western Pacific, Willey, 330.
